Coding Challenge

Question 1 (30 mins)

Points: Solved or not solved only (3 pts)

Write a function that takes a string and reverse the order of the characters in place

Rules:

1. Modify the array
2. Do not create a new array
3. ToCharArray() may be used
4. Loops can be used

Test Case:

"She sells seashells at the seashore"

// "erohsaes eht ta sllehsaes slles ehS"

```
Enter a string, then let's reverse it:
She sells seashells at the seashore
erohsaes eht ta sllehsaes slles ehS
```
